## Frontend Developer(React)

### PROFESSIONAL SUMMARY

Creative and detail-oriented Frontend Developer with expertise in React.js and strong proficiency in JavaScript. Collaborative team player with excellent problem-solving skills and a proactive attitude. Experienced in developing functional and visually appealing user interfaces while ensuring optimal performance and cross-browser compatibility. Proven ability to integrate frontend components with server-side logic using RESTful APIs. Stay up-to-date with the latest frontend development trends and best practices to enhance the development process. Strong communication and collaboration skills contributing towards effective teamwork.

### PROJECTS

#### 1. **Airtable** | 🌐 | 📱

- Developed a service-based website similar to Google Sheets with advanced features
- Implemented a responsive navbar and different components and functions for buttons
- Utilized React.js to create the entire interface, including login form and sign-up page
- Enhanced functionality by adding a Todo list section with different logins
- Responsible for creating an Admin Page and integrating it with the rest of the application
